My Contribution in today's work:

AI Health Prediction Module

The **AI Health Prediction module** helps doctors predict a patient's health risk using AI. It analyzes patient information, estimates the risk level, predicts future health trends, and provides recommendations to support better treatment decisions.

Patient Search

Helps the doctor quickly search for a patient.

Filter By

Filters patients based on **Age**, **Disease**, and **Risk Level**.

Recent Patients

Displays recently monitored patients along with their health risk.

AI Risk Score

Shows the patient's overall health risk as a percentage.

Prediction Overview

Displays the patient's current health status, AI confidence, priority level, and analysis time.

Future Health Prediction

Predicts how the patient's health risk may change over the next few days.

Personalized AI Recommendations

Provides simple health suggestions such as diet, exercise, medication, and sleep.

Download Report

Allows the doctor to download the AI health prediction report.
